The Kaggle logo, consisting of the word "kaggle" in a blue, lowercase, sans-serif font, is displayed on a light blue rectangular background.A pink, four-pointed starburst graphic with a thin outline, positioned to the right of the text.

it is an online platform that provides a set of tools and resources for data analysis enthusiasts, including challenges, community, forums, data sets, educational files, courses, and notebooks, allowing users to create, share and develop their projects.

introduction

Discover how Airbnb, since its inception in 2008, reshaped the travel industry by connecting individuals with unique accommodation experiences globally. The company's mission, "Belong Anywhere," propelled it to become a key player in over 100,000 cities.

Genesis of the Company

Founder(s) Inspiration & Motivation:

Airbnb was founded by Brian Chesky, Joe Gebbia, and Nathan Blecharczyk. The trio, struggling to pay rent in San Francisco, came up with the idea of offering lodging to attendees of a design conference. This experience of creating makeshift accommodations sparked their vision for Airbnb.

Initial Idea and Vision:

The initial idea centered around allowing people to rent out their living spaces, be it a spare room, apartment, or even a couch, to travelers seeking unique and affordable stays. Airbnb's vision was to create a platform that fostered a sense of belonging, connecting hosts and guests beyond just accommodation.

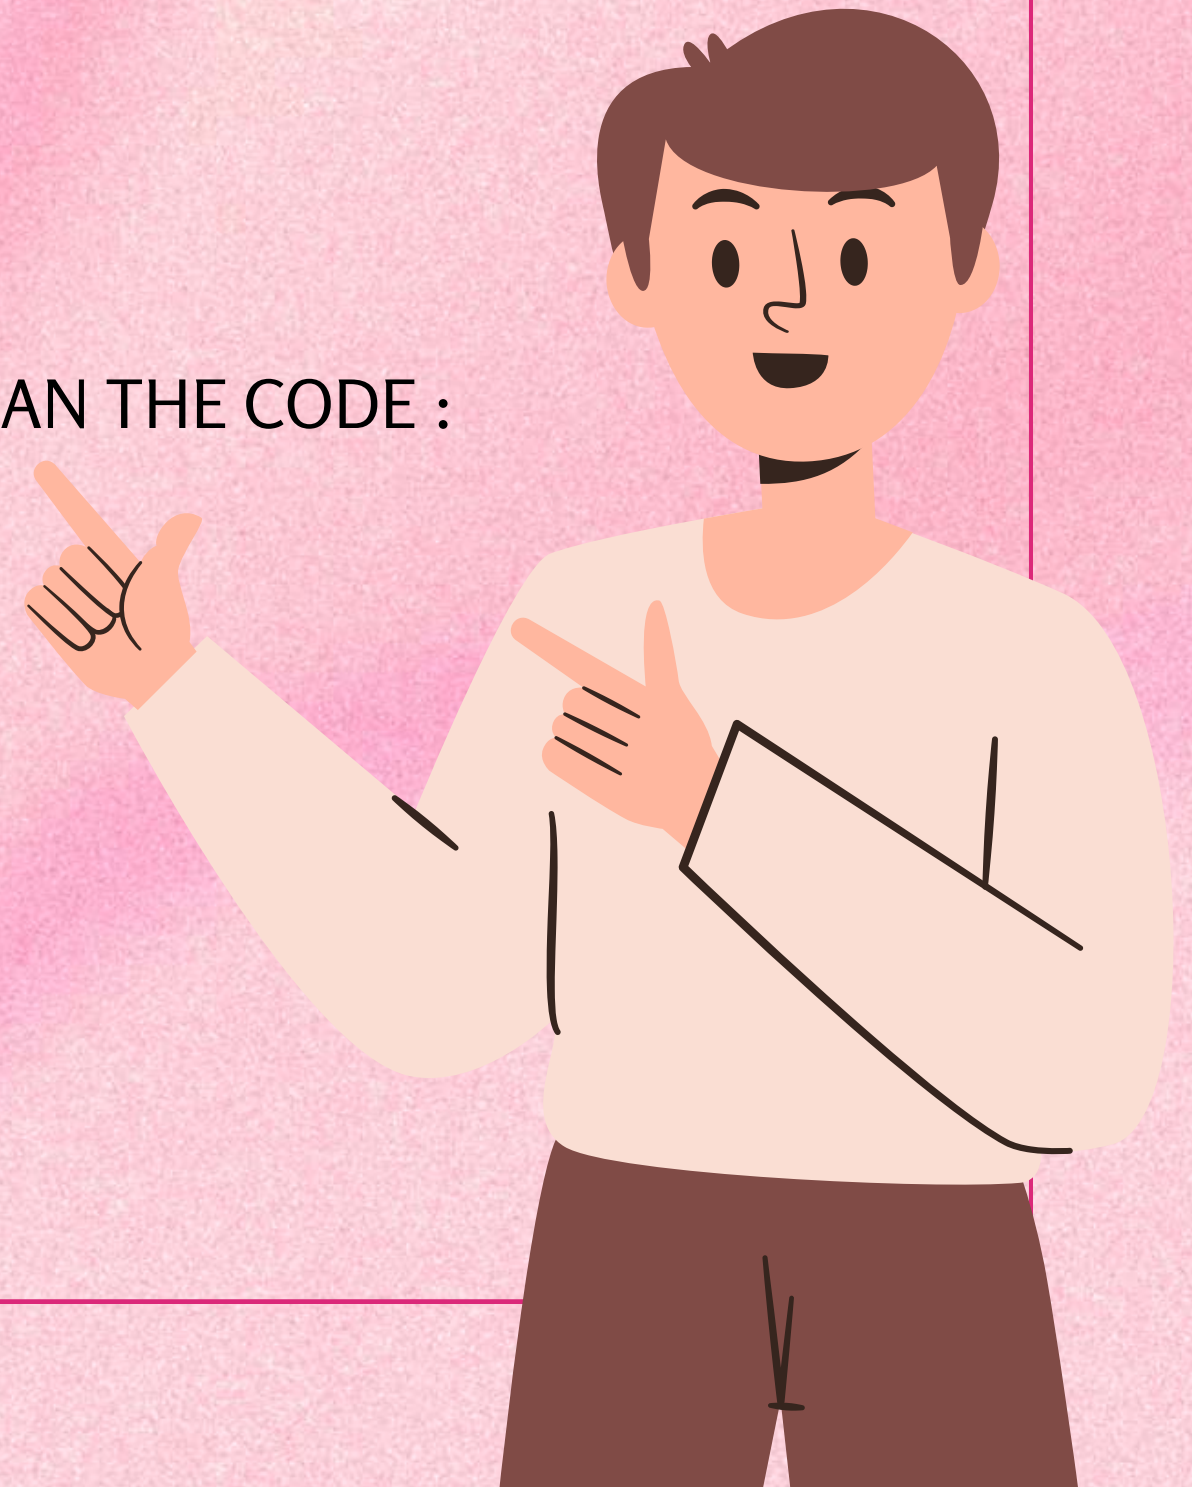

About Dataset

- **Listings, including full descriptions and average review score**
- **Reviews, including unique id for each reviewer and detailed comments**
- **Calendar, including listing id and the price and availability for that day.**
- **it is contain 102600 records.**
- **it also contain the name of the apartment, host id, host identity verified, host name, country, country, cancellation policy, room type, price ,service fee, last reviews, house rules.**
